January 2023

### PROJECTS

**Weather App** [↗](#)

Weather app is a mobile responsive web app by creating fetch API . this app can show temperature, humidity, and wind speed by user-specific choice of location.

**Banking app** [↗](#)

The banking app is a mobile responsive website. this app can create an account and store all the data by using the browser's local storage. so the specific account can be accessed by a unique account number. it is session independent app so the data is always stored.
